

# CREDIT RECOVERY

If a student fails a required course, they will need to recover that credit in one of the following ways:

1. **Retake** the same course during a subsequent semester or year. This may be the only option to make up credit with some courses.
2. **Summer School** – summer school offers credit recovery for students in English, Social Studies, Math, Science and Work Experience (elective). The Apex Online Learning Curriculum is used. The summer school schedule and details become available in May each year. Please see your school counselor to register for summer school in late May.
3. **Learning Lab** – Learning Lab is a credit recovery option offered during the school day via supervised online coursework. The Apex Online Learning Curriculum is used, learning is facilitated by the classroom teacher in a small class setting where work is done independently. Requests for registration are to be sent to the student's counselor and are prioritized based on student need. Learning Lab spots are limited!
